## TERRALITE™ XPS DELIVERS WHEN GPS CAN'T.

**Getting the most out of your machine guidance and control systems** depends on 24/7 availability of high-precision GPS. You can depend on Novariant's Terralite™ XPS to deliver precision position data when GPS can't. Novariant's GPS augmentation technology has been used in production environments since 2000. Some of the world's deepest and most complex pits in the Australia, Chile, Indonesia, and the United States depend on Terralite™ XPS to eliminate GPS blind spots.

**Demand signal reliability throughout your mine from the world leader in GPS augmentation systems. Contact Novariant today for more information on Terralite™ XPS.**
